

Managing Schema

Keeping Your Schema in Sync:

Schema updates may be needed when your upstream GraphQL service changes.

The Tyk Dashboard displays the last sync timestamp for your API schema.

Core Settings Schema Playground Advanced Options

This schema has been automatically downloaded from the upstream provided and is read only. Schema last updated about 2 hours ago.

↻ UPDATE

Syncing the Schema:

Click "Get latest version" to fetch the schema via introspection query.

Then, click "Update" (top right) to apply the new schema.

Upstream Authentication (if protected):

Navigate to: API > Advanced Options > Upstream Auth Headers

Add your Authorization Header (e.g., bearer token or basic auth).
