Rahmat - Sr. Customer Solutions Architect

Introduction to Open Telemetry

Collection of tools to generate and export telemetry data (metrics, logs, and traces)

Supported by all major observability vendors and open source tools.

Second most popular open source project in the CNCF after Kubernetes with a very active community.

Lightstep
from ServiceNow

dynatrace

new relic.

DATADOG

Grafana Labs

Red Hat

elastic

observIQ

honeycomb.io

sumo logic

JAEGER

Prometheus

SENTRY

SigNoz

Aspecto

OpenTracing

OpenTelemetry

OpenTracing & OpenTelemetry

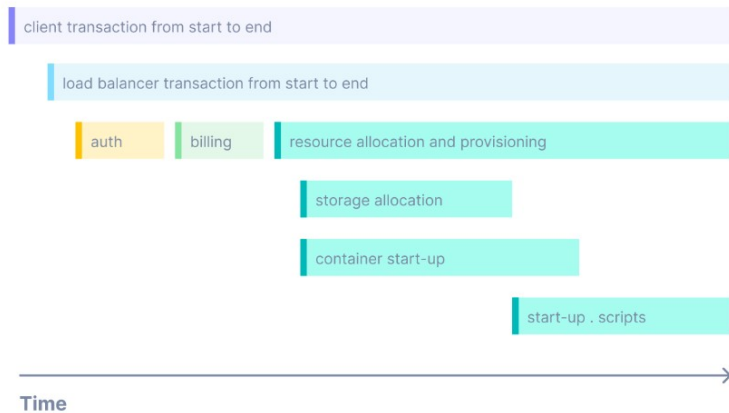

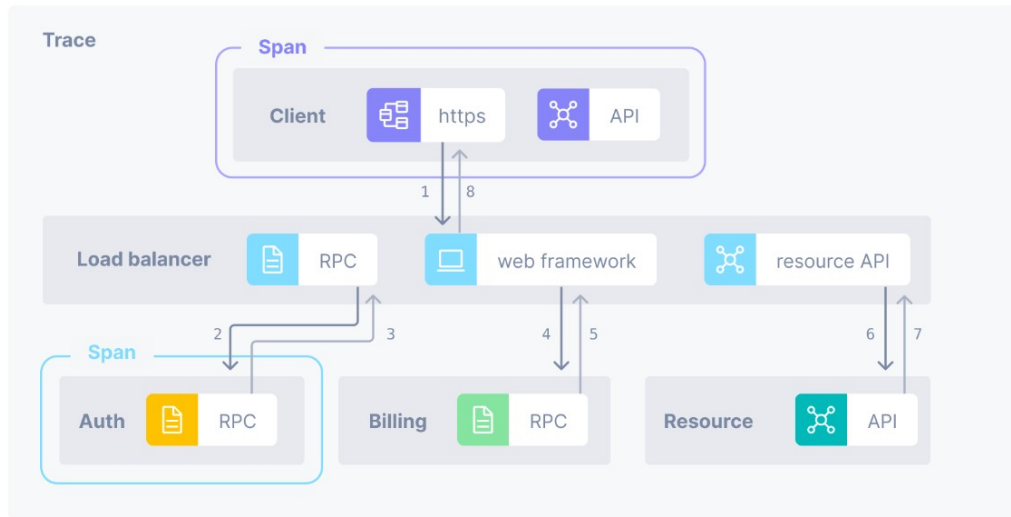

- **OpenTracing**

- Vendor-neutral API
- Abstracts tracing implementations
 - Jager, Zipkin or New Relic
- Focuses only on tracing
- Requires manual instrumentation

- **OpenTelemetry**

- Successor to OpenTracing
- Data exported to backends like
 - Datadog, Dynatrace or Elasticsearch
- Comprehensive Framework for collecting traces, metrics and logs
- Supported by CNCF
- Extends capability by collecting metrics and logs

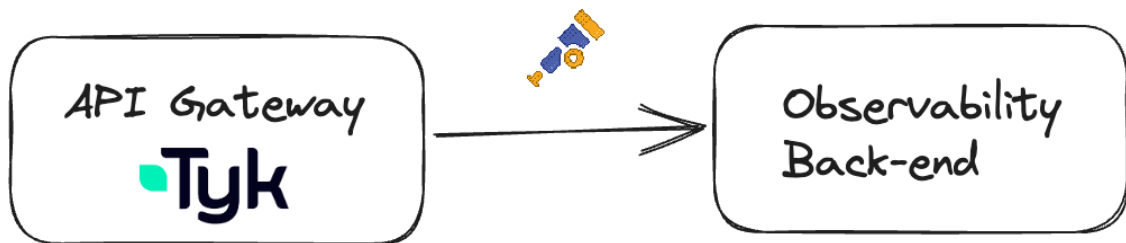

Traces and Spans

Open Telemetry support in Tyk Gateway

Version	Tyk Gateway 5.2
License	No additional license needed, available for all OSS and commercial users
Tyk Cloud	Only available for self-hosted gateways (self-managed and hybrid gateways) Support for gateways hosted in Tyk Cloud comes with additional license.
Deprecation	OpenTracing (older version of OTel) is deprecated

Set up

Tyk Gateway

tyk-gateway:

image: [tykio/tyk-gateway:v5.2.0-rc5](#)

ports:

- 8080:8080

networks:

- tyk

environment:

- TYK_GW_OPENTELEMETRY_ENABLED=true
- TYK_GW_OPENTELEMETRY_EXPORTER=grpc
- TYK_GW_OPENTELEMETRY_ENDPOINT=otel-collector:4317

volumes:

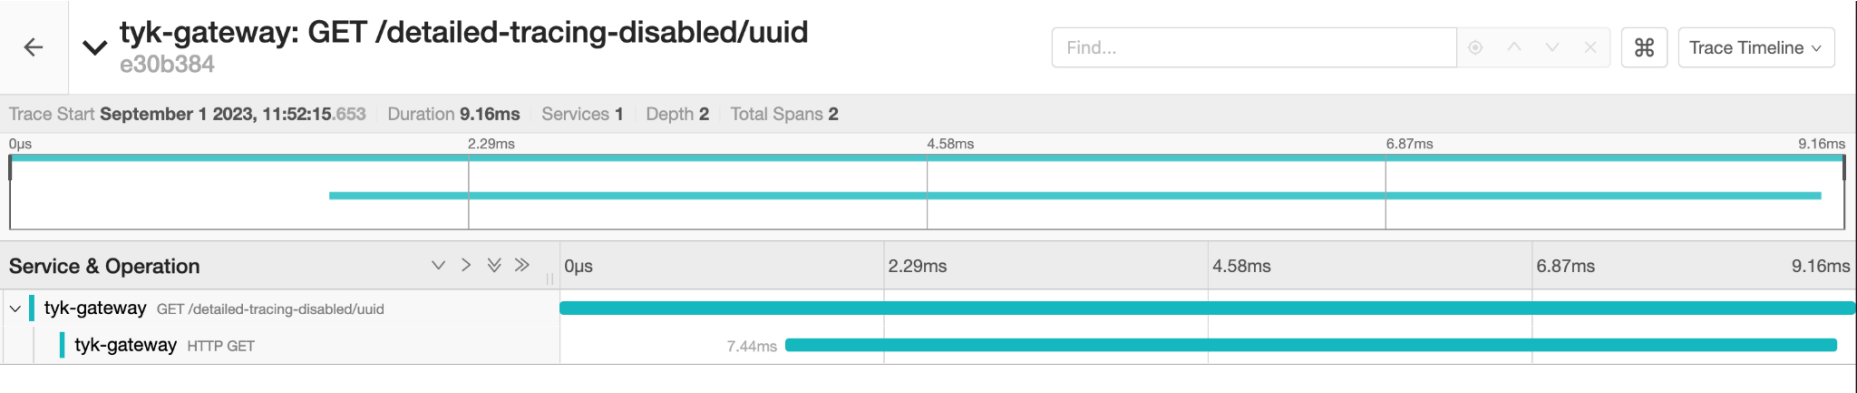

- ./deployments/tyk-gateway/apps:/opt/tyk-gateway/apps
- ./deployments/tyk-gateway/tyk.conf:/opt/tyk-gateway/tyk.conf

depends_on:

- tyk-redis

Per default: 1 span per API call

enabled_tracing to `false`

Detailed tracing for troubleshooting detailed_tracing to `true`
